

REPLACEMENT PUMPS

Powering a better future

Solutions for the zero-carbon transition

SVANEHØJ
An IIT Company

Are you experiencing performance issues or repeated failures with your existing pumps?

At some point, it is more cost efficient to replace a pump instead of repair. Therefore, Svanehoj Singapore can replace your old, worn pumps quickly and efficiently - regardless of the pump brand.

We can replace your existing Svanehoj Singapore or offer a cost efficient solution to replace a pump of any other brand which will include the replacement pump, the adaptors and fittings to enable the existing pump to be changed efficiently.

We take care of pump solutions along with the subsequent service to lower your operational costs associated with pump maintenance.

Replacement pumps

Model C2G
Vertical in-line overhung pumps with single suction impeller, radially split casing with rigid coupling options.

Model CA
Vertical in-line between bearing pumps with double suction impeller, axially split casing with rigid coupling options.

Model CB
Vertical in-line between bearing pumps with double suction impeller, axially split casing with flexible coupling options.

Additional solutions

In addition to standard seawater and freshwater applications for centrifugal pumps, we can also supply replacement pumps for most marine applications including screw, turbine, gear and progressive cavity type pumps.

Model CG
Vertical inline single stage pump in single suction impeller, radially split casing with flexible spacer coupling and hydrodynamic sleeve bearing.

Five good reasons to choose Svanehoj Singapore

Fast delivery

At Svanehoj Singapore, we guarantee fast delivery. We have a large warehouse in Singapore with genuine spare parts. These ready stocks are available for immediate despatch to fulfil urgent request from customers globally.
