Overhaul of pumps

Svanehøj Singapore overhauls pumps of all sizes and brands. With over 130,000 ships passing through the Port of Singapore annually, our fully equipped workshop is advantageously located to provide immediate and reliable assessments and services, ensuring swift and high-quality maintenance solutions to meet maritime needs.

From planned service to emergency repairs

High capacity and proven quality

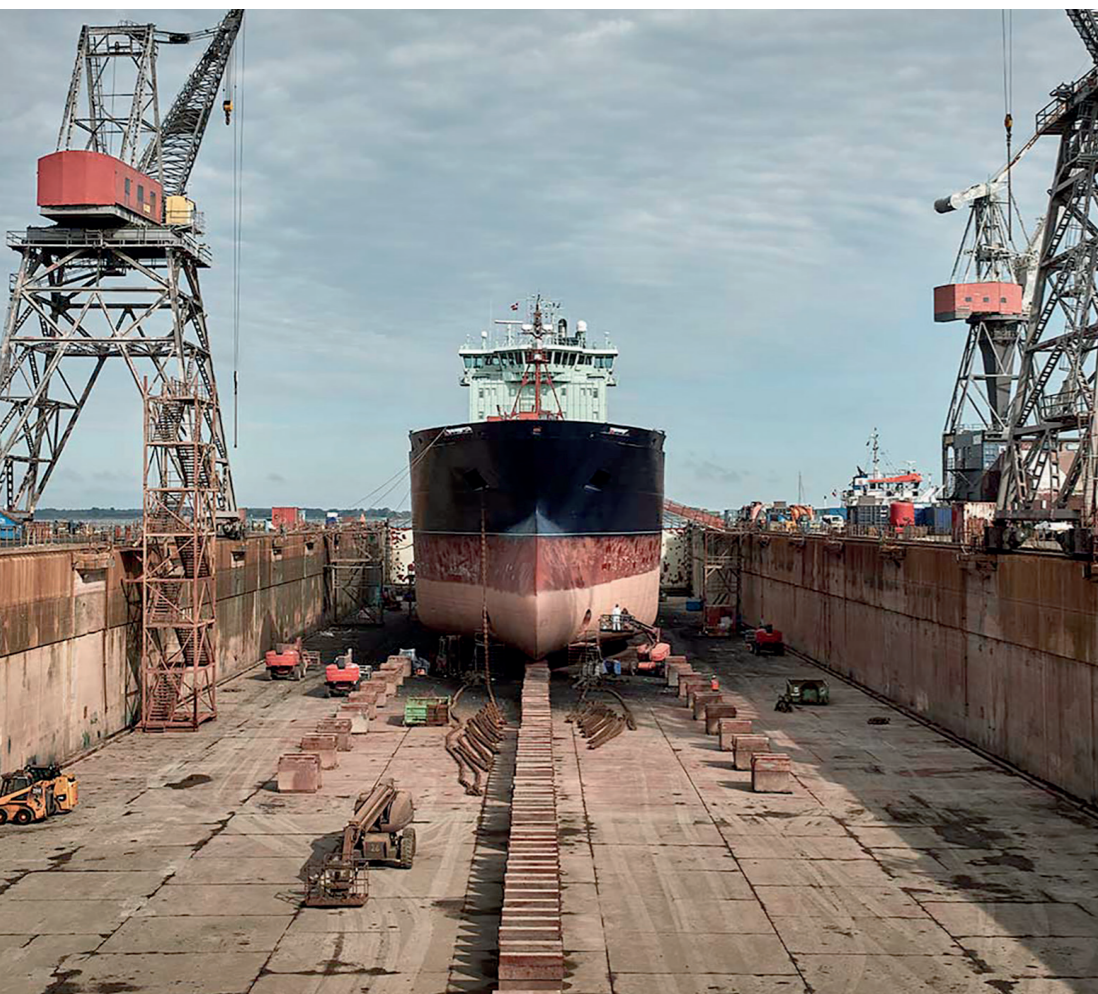

Our workshop in Singapore is set up to handle even the largest engine room pumps, providing dependable, high-quality assessment performance and hydraulic test, overhaul, and reverse engineering, allowing you to keep your vessel on schedule.

Short delivery time

Our specialists provide fast troubleshooting, repair, retrofit, and overhaul of all types of engine room pumps – planned, intermediate, or in case of unexpected breakdowns.

Local availability

With a strong local presence and on-site services, we offer rapid response times to meet your needs – during dry dock, voyage, or port operations.

From dock to deck service

Specialized workshop machinery

From welding to coating, our workshop is fully equipped to assess, overhaul, and upgrade your engine room pumps.

Broad manufacturer compatibility

No matter the brand, we restore functionality to all pumps, extending the life of your equipment.

Flexible service options

While your ship is in dock, we can provide replacement pumps from our stock or conduct necessary repairs on the spot.

Tailored to your schedule

Our full-scope service setup fully adapts to your operational needs, avoiding unnecessary time loss.

Replacement pumps

We offer storing of replacement pumps for immediate exchange to ensure continuous operation of your vessel.

Your preferred service partner

With almost a century's worth of knowledge across all pump types, Svanehøj Singapore is the obvious service partner of choice. As a leading full-scope service and aftersales provider, we have profound know-how and expertise that goes way beyond simple repairs. You will benefit from quick and proactive troubleshooting, reduced expenses, and collaboration with only one OEM-representative provider thanks to our combination of services.

Are you experiencing performance issues or repeated failures with your existing pumps?

At some point, replacing a pump becomes more cost-efficient than repairing it. Svanehøj Singapore offers quick and efficient pump replacements for any brand, including our own. We provide a complete solution, including the replacement pump, adaptors, and fittings, ensuring a smooth and efficient transition. We handle all aspects of pump solutions and ongoing service to help lower your operational costs related to pump maintenance.

We can replace your existing pumps or offer a cost efficient solution to replace a pump of any other brand, which will include the replacement pump, the adaptors, and fittings to enable the existing pump to be changed efficiently.

We take care of pump solutions along with the subsequent service to lower your operational costs associated with pump maintenance.

Original spare parts for all your pumps

With genuine spare parts from Svanehøj Singapore you are guaranteed optimum performance and minimized critical downtime.

By choosing our genuine spare parts, you also gain access to our trusted support and maintenance services, available 24/7.

To ensure fast delivery, we maintain large stocks of critical spare parts, ready to be shipped globally from our workshops in Denmark and Singapore.
