

Centrifugal pumps

Model CG

Sectional Drawing

Description

Vertical in-line single stage pump in single suction impeller, radially split casing with flexible spacer coupling and hydrodynamic sleeve bearing.

Capacity: 30-1100 m³/h

Differential pressure: 15-120 mlc.

Construction code

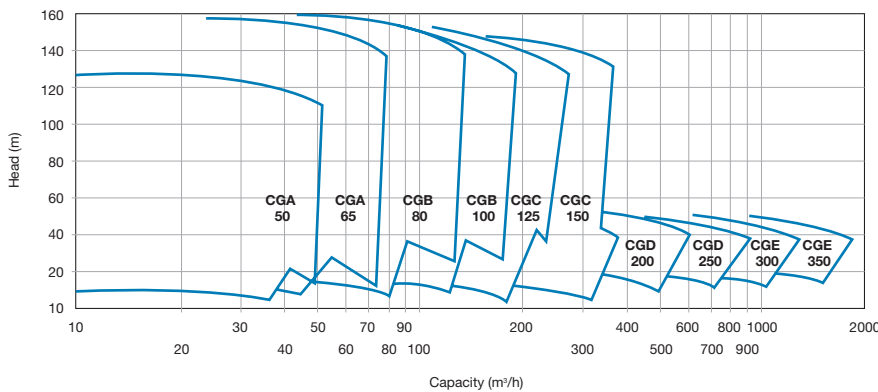

NOTE: For casings and impellers various additional material options may be available on request. e.g. other grades of bronze, Duplex, Nodular Cast Iron etc. For shafts various materials available on request e.g. Monel, Super Duplex - UNS32760 etc. For driver options others transmission devices e.g. gear coupling available on request. Other coupling options are available on request. Various mechanical seal options available on request e.g. balanced seal, harden faced seal faces, Hastelloy metals parts etc. For elastomers materials other options available on request e.g. EPDM. Product lubricated sleeve bearing is available on request.

Pump configuration

Capacity range

The manufacturers reserve the right to alter the specification and data to incorporate improvements in design. Certified drawings will be issued on request.
